When to Quarantine

Stay home if you might have been exposed to COVID-19

CDC continues to endorse quarantine for 14 days and recognizes that any quarantine shorter than 14 days balances reduced burden against a small possibility of spreading the virus. CDC will continue to evaluate new information and update recommendations as needed. (updated February 11, 2021)

Local public health authorities determine and establish the quarantine options for their jurisdictions. **Quarantine** is used to keep someone *who might have been exposed to COVID-19* away from others. Quarantine helps prevent spread of disease that can occur before a person knows they are sick or if they are infected with the virus without feeling symptoms. People in quarantine should stay home, separate themselves from others, monitor their health, and follow directions from their state or local health department.

All schools within Madison County will adhere to the 14-day quarantine option.
